WORKPLACE OPERATIONS MANAGER | SITE OPERATIONS | VENDOR & SERVICE DELIVERY

SUMMARY

Workplace operations and service delivery leader with 6+ years managing high-touch customer environments across SaaS, cloud, and mission-critical technology platforms, plus 10+ years supporting UAS field operations. Experienced coordinating cross-functional teams, resolving operational tickets, maintaining documentation, and supporting safe, efficient office, field, and remote operations workflows.

CORE SKILLS

Workplace Operations • Site Readiness • Vendor Coordination • Facilities Ticket Triage • Office Services • Hospitality-Minded Support • Logistics • Space & Resource Planning • Operational Documentation • Supply Tracking • Safety & Compliance • Cross-Functional Collaboration • Zendesk • Salesforce • Google Workspace

PROFESSIONAL EXPERIENCE

Bolero Tech — Technical Customer Success Manager | 2022–2025

- Managed enterprise and mid-market relationships totaling \$25M+ ARR, coordinating service delivery across customers, stakeholders, and technical teams.
- Served as escalation owner for operational and platform issues, triaging requests from intake through resolution in Zendesk and Salesforce.
- Coordinated follow-through with engineering, support, success, and product partners to keep high-priority environments running smoothly.
- Built onboarding documentation, SOPs, and knowledge resources that improved repeatable service delivery and customer readiness.
- Translated feedback and operational pain points into action plans that improved workflows, support quality, and overall experience.

Simply Positivity — UAS Pilot / Drone Operations Specialist | 2015–Present

- Executed 1,000+ commercial drone missions across public safety, infrastructure, mapping, and inspection environments.
- Managed mission logistics, equipment readiness, airspace coordination, field safety planning, and site-specific requirements.
- Monitored autonomous flight systems and real-time telemetry in Remote Operations Center environments to maintain reliable operations.
- Diagnosed RF interference, GPS degradation, telemetry dropouts, and hardware/software communication failures impacting continuity.
- Authored diagnostics, incident documentation, FAA-compliant reports, and operational logs to improve reliability and compliance.

HappyCo — Customer Success Manager | 2020–2022

- Delivered high-touch support for SaaS applications used across distributed web and mobile operational workflows.
- Managed customer escalations and coordinated issue resolution with engineering while maintaining clear status ownership.
- Led onboarding, platform configuration, user training, and adoption initiatives for enterprise client teams.
- Converted recurring customer needs into workflow improvements that reduced friction for end users.

Open Water — Software Engineer | 2017–2019

- Resolved distributed system defects and customer-impacting technical issues to improve platform stability.
- Built API integrations and improved cloud-based application reliability across production environments.
- Partnered with Customer Success teams to streamline implementation, troubleshooting, and support processes.

CERTIFICATIONS

- FAA Part 107 Remote Pilot Certificate
